## GLOSSARY OF TERMS

TERM	DEFINITION
<b>Anniversary Clock</b>	A traditional type of mantle clock with a rotating pendulum encased in a glass dome. The name comes from mechanical movements, which needed winding once a year.
<b>Ascending Alarm</b>	An electronic alarm which starts off softly and gradually becomes louder in stages.
<b>Carriage Clock</b>	A traditional type of mantle, desk or table clock characterised by having a handle on top. Originally a functional feature, the handle is now most often ornamental.
<b>Cloisonné</b>	An intricate process in which a skilled craftsman creates a highly decorative design. A copper plate is deeply etched with the artist's pattern. Silver plating is bonded to the raised surfaces and polished. Then, special enamel paints are applied and fired in a kiln several times to achieve a hard, glossy surface.
<b>Dual Chime</b>	An electronic clock movement that can be set to select one of two chimes. These are most commonly Westminster/Whittington.
<b>Dual Time Feature</b>	Two different time zones are displayed on the clock dial. These dials can be a combination of two separate analogue subdials or an analogue digital subdial.
<b>Easy-To-Set</b>	Front Rotating Alarm ring or "bezel" around the clock dial can be rotated to easily set the alarm time. This is the most convenient alarm setting feature available.
<b>Electro Luminescent (EL)</b>	A bright blue-green panel lit by current from the battery, at a press of a button.
<b>Light Sensor</b>	A device that automatically disengages all alarms and melodies when there is no available light. Light sensors are available in some mantle clocks and wall clocks with chimes or musical movements.
<b>LED</b>	Light-Emitting Diode is an electronic semiconductor device that emits light when an electric current passes through it.
<b>Luminous Hands and Markers (L)</b>	Markers on dials or hands glow in the dark for a period of time.
<b>MDF</b>	Medium Density Fibreboard is an engineered wood product formed by breaking down softwood into wood fibres and combining it with wax and resin to form panels by applying high temperature and pressure.

TERM	DEFINITION
<b>Night-time Silencer</b>	A mechanism featured in a chime clock that automatically shuts off the chime at 11:00pm and resumes functioning at 5:45am.
<b>Regulator</b>	The pendulum of a clock, which originally served the function of “regulating” a mechanical time-keeping mechanism, it is now a popular ornamental feature.
<b>Rotating Pendulum</b>	An ornamental pendulum that moves in a circle, stops, and then rotates in the opposite direction, or rotates in a continuous circle.
<b>School-house Clock</b>	A traditional style wall clock featuring a long rectangular wooden case with a pendulum.
<b>Skeleton Clock</b>	A “see through” design that exposes the clock movement wheel assembly to view. There is usually a sub-second hand.
<b>Snooze Alarm</b>	This alarm, once stopped, allows for three to five minutes additional sleep before the alarm resumes sounding.
<b>Step Second Hand</b>	Unique to quartz clocks, this “start-stop-start” motion precisely measures time in one second intervals.
<b>Sweep Second Hand</b>	The second hand moves in one continuous motion and has the advantage of being extremely quiet while operating.
<b>Tambour</b>	This is a traditional style whose name is based upon its resemblance to a small drum-like tambourine.
<b>24 Hour Time</b>	Also known as military time. To convert 12 hour time to 24 hour time add 12 to any PM time. For example: 2:00pm is 12 + 2 or 14:00 in 24 hour time. To convert 24 hour time to 12 hour time, subtract 12 from 13:00 through 24:00. For example: 14:00 in 24 hour time is 14 - 12 or 2:00pm in 12 hour time.
